WATER CONSTRUCTION PERMIT 2023

*When water is requested for construction purposes, filling tanks or other such uses, an application therefore shall be made to the Utility in writing. Upon application provided for that purpose in the utility's office giving a statement of the amount of construction work to be done, or the size of the tank to be filled, etc. Payment for the water for construction shall be billed to the company at the scheduled rates. Current rate is **\$40.00** for hydrant use per day plus **\$7.12** per 1,000 gallons.*

Every truck must have the proper backflow prevention and each driver must have the proper knowledge of this backflow preventer.

*In no case, will any employee of the utility turn on the water for construction work, unless the contractor first presents a permit. With each fill the contractor must return to the utility office to report amount of water used: **enter the meter readings on each fill, beginning and ending along with name & date.***

Date: _____

Company: _____

Mailing address: _____
